PROJECTS

BT TRIONES 🔗
This is an vue electron application that hooks into Triones bluetooth devices. This allows users to control Troines bluetooth device from their Windows Or Mac Machine, allowing a user to change it's color based on value, audio or screen pixel

Tech - Vue, Vuex, NodeJS, Electron, SCSS, Chrome Bluetooth API

GOOGLE SKI PLOTTER 🔗
Google ski plotter is an Express/Vue web app that takes your google location data and determines if you're skiing or snowboarding based on location data and activity data provided by Google. This web app is for android users only who allow location data tracking by google.

Tech - Node, Express, Vue, Websockets, Axios, JSONstream, pm2, SCSS

VINCEROTI.COM 🔗
vinceroti.com is my personal website completely built with Vue.js framework. All hosted within an AWS S3 bucket.

Tech - Vue.js

REMIND 🔗
Remind is an iOS app that allows users to create a list of items that they want to buy at a store. It will find locations that have that item and notify you when you are near the location that has that item.

Tech – Ruby on Rails, Google Maps API, Heroku, Swift and xCode

Roles – Back-end rails RESTful API which talked to Google Maps and the iOS app

WIKIPEDIA CLONE 🔗
As a client project at Dev Bootcamp, we were asked to create a Wikipedia clone. Users can create pages, revisions, and see previous revisions side by side. The majority of the features are replicated and functioning. We focused extensively on testing during this project and agile development.

Tech – Ruby on Rails, Ajax, jQuery, and Circle CI

Roles – Frontend and Backend

SUMMARY

I strive to help others achieve success to ultimately grow as a team. I'm always looking to try new things and am excited to learn emerging best practices, in order to create unique and engaging experiences. Being able to share what I create with the world is the driving force that truly makes me so passionate about coding.

SKILLS

WEB DEVELOPMENT: Vue.js, Typescript, Vuex, CSS/SCSS, Nuxt.js, GA/GTM, SEO, AWS, Git, jest, Express, jQuery, React.js, Heroku, Ajax, Jasmine, Rspec, Docker, Ruby on Rails

EXPERIENCE

WARNER BROS. GAMES
Software Engineer - Frontend   **Aug. 2021 to Current**
Develop and maintain frontend of Warner Bro Games account site, OAuth SDK, and internal dashboard.
- Implementation of Vue and/or Vuex for account site, internal dashboard, and oAuth SDK
- Understanding of complex situations an account site user might run into and develop solutions via workflows to remediate those problems
- Implement and support services that power in-game online services
- Collaborate with other engineers (frontend and backend) to develop features that support sites, SDK, and internal dashboard.
- Work closely with designers using Figma to create features and improve user experiences
- Design initiatives for new features from clients and internal technical debt
- Ensure best practices for ADA and GDPR compliance - Write and review code, develop documentation, and debug problems, live, on complex systems

K2 SPORTS
Frontend Web Developer   **May 2017 to Aug. 2021**
Developed sites on a team-developed tech stack (Nuxt.js/Contentstack/Bigcommerce/Amplience) from Demandware & Ruby On Rails with scalability and best practices in mind. All while helping onboard contractors to meet critical deadlines and helping our DevOps team to ensure successful releases and site stability.

- Implementation of Vue/Vue-cli/Nuxt for Server Side Rendering of all marketing and e-commerce sites
- Migration of marketing/e-commerce sites from Demandware to Single Page Applications with SSR (ex: k2snow.com)
- Implemented Vuex for State Management of Vue Applications
- Integration of 3rd party Rest API into new architecture
- Performance and Accessibility audits of all new sites
- Managed communication and deployments with backend development team for successful releases
- Worked closely with web project managers to design and implement web applications, branded websites, and features

DEV BOOTCAMP
Web Development Graduate   **Aug. 2016 to Dec. 2016**
Graduated from Dev Bootcamp which is a 19-week intensive training program for aspiring web developers, specializing in Ruby, Rails, HTML5, CSS, Test Driven Development, Object-Oriented Javascript (AJAX, JQuery), Git and Source control, Heroku and Agile Development.

- Gained skills to learn new languages, frameworks, libraries, and conventions quickly.
- Programmed in various dynamics such as pair programming, solo programming, and group collaboration.

EDUCATION

Dev Bootcamp
Full-Stack Web Development 2016

College Of DuPage
Associate of Arts 2015
